

LIVET
LIVESTOCK FARMING AND ONE HEALTH APPROACH

WEBINAR

Zoonoses

May the 18th 11 am-12 pm (CET)

Kaspar Kovalenko

Dr.med.vet. Kaspars Kovalenko

University of Life Sciences and Technologies (LATVIA)

This webinar provides an overview of current, emerging, and re-emerging zoonotic diseases with a primary focus on viral and bacterial threats from a One Health perspective. Participants will explore the main drivers of zoonotic emergence, including globalization, wildlife interactions, environmental change, and antimicrobial resistance, together with the role of farmers and veterinarians in surveillance, diagnostics, prevention, and outbreak response. Contemporary examples such as avian influenza, vector-borne infections, and foodborne zoonoses will be discussed to highlight current regional and global public health risks.
